CONIFER EVERGREENS

ARBORVITAE (THUJA)

COLUMBIA ARBORVITAE (T. Columbia)
 Strong habit, foliage broad,
 with a beautiful silvery var-
 iegation, pointed, bushy.

GEORGE PEABODY GOLDEN ARBORVITAE
 (T. Lutea) Pyramidal form with
 bright golden foliage.

GOLDEN COLUMN ARBORVITAE (T. Or-
 ientalis Elegantissima) A com-
 paratively rapid growing Or-
 iental variety with bright
 golden color throughout the
 year. Desirable for contrast,
 bushy.

HOVEYI ARBORVITAE (T. Hoveyi)
 Dwarf dense, semi-globe form
 with bright green foliage.

TOM THUMB ARBORVITAE (T. Ellwan-
 geriana) A low broad pyramid
 with slender branches, inter-
 esting foliage variation.

CEDAR (CEDRUS)

HIMALAYAN DEODARA CEDAR (Cedrus
 Deodara) Foliage blue-green,
 branches feathery and spread-
 ing.

JAPANESE YEW (TAXUS)

BROWNII YEW (Taxus Brownii)
 Brown's spreading Yew, low
 compact, dark green.

JUNIPER (JUNIPERUS)

ASHFORDI JUNIPER (J. Ashfordi)
 Columnar with silvery green
 foliage. Much like Irish Jun-
 iper except not quite so com-
 pact or pointed and larger in
 diameter. Holds color well in
 winter.

BLUE PFITZER JUNIPER (J. Chinen-
 sis Pfitzerana) Same as reg-
 ular Pfitzer only foliage blu-
 ish.

IRISH JUNIPER (J. Hibernica) A
 distinct, slender, columnar
 with blue-green foliage. Its
 formality is invaluable where
 a narrow plant must or should
 be used.

SPRUCE (PICEA)

DWARF ALBERTA SPRUCE (P. Conica
 Glauca) A dense conical Pyra-
 mid with ascending branches
 and slender branchlets, bluish
 green. Slow growth, ideal
 Rock Garden and foundation
 plant.

MOERHEIMI SPRUCE (P. Pungens Com-
 pacta) Similar to Koster Blue
 Spruce, grows more compact and
 foliage deeper blue.

SPREADING DWARF SPRUCE (P. Ex-
 celsa Maxwellii) Slow growing,
 of globular form. Very com-
 pact and beautiful. Use same
 as Conical Glauca.

BROADLEAF EVERGREENS

(Shrub-type foliage, but most varieties hold leaves year around)

AZALEAS

KAEMPFERI AZALEA.....Orange Red
MACRANTHA AZALEA...Dbl. Salmon Pink
PINK PEARL AZALEA.....Double Pink
XMAS CHEER AZALEA.....Red

GABLES HARDIER AZALEAS

Evergreen as the more common Red
Hinodogiri, but as hardy and
available in several colors:

CAMEROON....Mulberry-Red Very Red
CLARET...Bronze, Claret-red, single
EDNA.....Bright Pink
H-12-G...Bright Scarlet, Dbl. Late
LA LUMIERE...Flame-Red, Sgl. Tall
MARY DALTON.....Salmon-Red, Early
ROSE GREENLEY.....White
ROYALTY.....Bright Purple, Double

ELEAGNUS (ELAIOS)

ELEAGNUS PUNGENS COMPACTA: A
MORE compact form of Eleagnus
Pungens. See main catalog on
page 3.

EUONYMUS (SPINDLE TREE)

EUONYMUS CARRIERI: A splendid
semi-spreading member of the
Euonymus family. Leaves are
smaller than Patens. The fol-
iage is grayish-green. For
walls, ground cover, border
edges.

FIRETHORN (PYRACANTHA)

P. CRENATA SERRATA: A beautiful
variety of the evergreen Burn-
ing Bush. Very affective and
desirable. In early spring
the plant is covered with white
flowers, which are followed by
bright red berries in the fall.

P. GIBBSI: Spreading type, coral
red berries.

P. GRABBERI: Same as above Pyra.
Serrata only bushier. Red
berries.

HOLLY (ILEX)

ILEX OPACA CROONENBURG: Same as
regular American Holly only
free from usual yellowish tint.
Bears berries almost continuous
when established.

ILEX OPACA FEMINA: Berry-bearing
American Holly.

ILEX OPACA HUME: New Holly sim-
ilar to Ilex Opaca Croonenburg.

ILEX OPACA PALATKA: Its evergreen
leaves are practically spine-
less. The deep red berries are
borne in heavy cluster, persist
on the tree until spring.

ILEX PERNYI: (Chinese Holly)
Leaves crowded with 1 to 3
rigid spines on each side, dark
green and lustrous. Fruit
bright red. A handsome ever-
green shrub form, holly.

BROADLEAF EVERGREENS

LAUREL (PRUNUS)

ENGLISH LAUREL (*P. Laurocerasus Officinalis*) Wide shiny foliage heavy growth, good fill in, container and foundation plant, unusual tropical effect.

ENGLISH LAUREL (*P. Laurocerasus Schipkaensis*) Shiny foliage, semi-spreading upright growth, spikes of white flowers in the spring. Easily pruned. Grows well in adverse conditions and in containers

PHOTINIA GLABRA: A very handsome, hardy, evergreen shrub which will grow to medium height. The new foliage is wine colored and very attractive among other evergreens during the growing season. Should be clipped often to induce more new growth.

VIBURNUM CHENAUTI: Improved Barkwood similar flowers, better growing habit, attractive glossy foliage.

WINTER BLOOMING GARDENIA (*Gardenia Veitchii*) Blooms extensively. Can stand but few degrees of frost. Must take inside during winter.

WINTER BLOOMING HEATH (*Erica Darlyensis*) Low evergreen, gray-green foliage. Blooms lavender very early in spring. Makes a fine border, rock garden and pot plant, grows easily.

WINTER JASMINE (*Jasmine Nudiflorum*) A small spreading shrub bearing bright yellow flowers early in the spring before the foliage appears.

FLOWERING SHRUBS

AZALEA PONTIACA HYBRIDS

(Hardy Ghent Azaleas) Extremely hardy hybrids with trumpet-shaped flowers, flowering after the Azalea Mollis in large trusses

BOUQUET DE FLORE.....Deep Pink
COCCINEA SPECIOSA.....Orange
DAVIESII.....White
IGNAEA NOVA.....Carmine Red
NANCY WATERER.....Golden Yellow

BIRD OF PARADISE (*Ponciana Gillettii*) An upright spreading shrub with fern-like foliage. Has large clusters pea shaped, yellow flowers with brilliant red stamens. If killed to ground, sprouts up in spring and soon in bloom.

CARYOPTERIS BLUE MIST: Semi-tall making a mound. Covered from August to Autumn with numerous clusters of powery blue fringed flowers

FLOWERING SHRUBS

FORSYTHIA (GOLDEN BELL)

F. VIRDISSIMA: Green stem Golden bell. Flowers greenish yellow

GOLDEN SPIREA (Spirea Opulifolia Aurea) Golden leaved variety producing white flowers in May June.

HARDY ORANGE (PONCIRUS)

CITRUS TRIFOLIATA: Attractive dwarf growing, very thorny, fragrant blossoms and pungent fruit. Ideal for Hedge, masses among shrub borders. In winter after leaves fall, twigs stay green.

HONEYSUCKLE (LONICERA)

MORROW HONEYSUCKLE (Lonicera Morrowi Honeysuckle) An upright Honeysuckle bush, creamy white flowers, followed by bright red berries.

RED HONEYSUCKLE (Lonicera Zabelii) Very hardy, upright, flowers April-May. Reddish-Pink blooms followed by red fruit.

HYPERICUM PROLIFICUM: About the same as Hypericum Moserianum except grows taller. See main catalog on page 6.

JAPANESE QUINCE (Cydonia Japonica Rubra) True upright Red, Non fruiting.

JETBEAD (Rhodotypos Kerriades)

Green serrated leaves, white flowers May and June followed by black fruit.

KERRIA JAPONICA: Beautiful, yellow flowers. June-September.

LILAC HYBRIDS

MME. ANTOINE BUCHNER, Double Pink
SOUV DE LOUIS THIBAUT, DbI, Lilac
WM. ROBINSON, Double Magenta Pink

MAGNOLIA (Small Flowering) A miniature Soulangeana in growth, habit and bloom. Very fine for the small home where space is limited and a small flowering shrub is needed.

MOUNTAIN FLEECE FLOWER (Polygonum Amplexicaule Rubrum) Different and unusual shrub displaying a shower of fleecy flowers that are first white, then pink, and later a striking red. The branches and stalks freeze back each winter, but more and stronger cane like stalks come again in early spring. Usually blooms in Sept.

PEACH (PRUNUS)

PEPPERMINT FLOWERING PEACH: This is really a beauty. Two-tones in every way.

RAINBOW FLOWERING PEACH: Five different colors of blossoms on one tree, very unusual and attractive.

FLOWERING SHRUBS

PEACH (PRUNUS)

VIBURNUM

RED LEAF PEACH: Bright red in spring dulling to deep maroon towards fall. Deep rose blossoms against red foliage create a most pleasing contrast.

SHOWER OF GOLD (Cassia Marylandica) Quick growth, easy culture and profuse bloom first year. Grows 3 to 6' high. Bright yellow flowers from June till frost.

SMOKE TREE (Rhus Cotonoides) Rapid grower, massy mist panicles of flowers. July-August.

VIBURNUM

V. AMERICANA: Handsome shrub, single white flowers in April and May. Bright scarlet berries hanging until spring.

V. DENTATUM (Arrowwood) Attractive foliage, white flowers, April-May, followed by bluish black fruit.

V. LANTANA (Wayfaring Tree) Upright attractive deep green leaves, single white flowers May. Bright red fruit changing to black.

V. LENTAGO (Nannyberry) Large growing upright shrub or small tree. Single white flowers in May. Shining green leaves. Large blue black fruit.

V. MOLLE (Kentucky Viburnum) Similar to Dentatum of slower growth and more attractive foliage.

V. PRUNIFOLIUM (Black Haw) Shrub or small tree with spreading rather stout branches. Flowers pure white. April-June.

VIRGINIA WITCH HAZEL (Hamamelis) Ribbon like, yellow flowers in late autumn. Good for natural planting and shady places.

WEIGELA LUTEA. Hardy free flowering shrub of spreading habit with bell or trumpet shaped flowers. Thrives in most soils. Yellow bloom.

WINGED EUONYMUS (Euonymus Alatus Compacta) A more compact and slower form of Euonymus Alatus. See main catalog on page 6.

WINTERBERRY (Ilex Verticillata) Deciduous Shrub Holly, very attractive with its many berries. Two plants required for pollination.

KASHMYR BOUQUET (Clerodendron Bungei) A showy shrub, big heart-shaped green leaves and showy rosy red Hydrangea, very fragrant. May freeze down but with warm weather comes up again. New and unusual.

TREES FOR SHADE, SHELTER AND BLOOM

BALD CYPRESS (*Taxodium Distichum*) Graceful, light green feathery foliage, narrow pyramidal habit or limited spaces, bark light cinnamon brown, flakey. A worthwhile and unusual variety, fine specimen tree for open lawn, groups and corners.

BIRCH (*Betula*) Multiple stem clump white Birch. See main catalog on page 3

EUROPEAN MOUNTAIN ASH (*Sorbus aucuparia*) Narrow pyramidal tree, white flowers, orange-yellow fruit.

FLOWERING CRAB (MALUS)

✓ **ALAMY FLOWERING CRAB:** Has large blossoms similar to Dogwood of persistent red petals white var. tags at base of each, giving the effect of a five pointed star. A hardy version for use instead of Pink Dogwood, Redder than Dogwood.

✓ **ELEYI:** Attractive reddish foliage in spring. Glossy dark flowers followed by showy red fruit.

WEeping FLOWERING CRAB (*Weeping Malus*) The trunk stem is upright, the branches weeping, the flowers crimson, purple and buds red, a novel and particularly beautiful addition for every lawn, requires little space.

GOLDEN RAIN TREE (*Koelreuteria paniculata*) Of globular shape, yellow blossoms in July, large seed pods hang on a long time after the flowers disappear, a unique and different dwarf tree.

MIMOSA (*Albizia Julibrissin*) Very fast growing tree of spreading habit. Fragrant pink tinted feathery flowers are borne in great profusion during the summer.

MORaine LOCUST (*Locust Robinia Pseudoacacia*) Is an improved variation of the Honey Locust with a round head when young, but tall and vase shaped when older attaining a height of about 80 feet. A stately evergreen tree of tidy habits. Dark green, lacy foliage leaves, some sunlight filters through and grasses do well under the tree. Exceptionally fast growing, disease resistant shade tree you can enjoy where ever planted.

OAK (QUERCUS)

SCARLET OAK (*Q. Coccinea*) With gradually spreading branches forming a round-topped rather open head. Especially valuable for its brilliant scarlet fall coloring. Grows well in dryish locations.

WILLOW OAK (*Q. Phellos*) Medium sized tree, beautiful birch like narrow foliage, turning pale yellow in fall. Prefers moist soil, leaves are narrow shape.

SUGGESTIONS FOR DEVELOPMENT AND CONTINUATION OF A GOOD LAWN

This program is too tedious for most persons and therefore there is not too much good grass, however the following is a program of care that, for us has accomplished beauty the year around that only, proper care produces.

Following is an idea of the care necessary in order to perpetuate a good growth of grass. A good growth can not be maintained unless later care is given. A good lawn can not be had even with the most extensive preparation if the follow up steps are not followed also.

These are suggestions for as near a perfect lawn as possible, and Potter Nurseries Professional Blend Lawn Seed affords on the average a better lawn in the Tri-State area than most other commercial mixtures of seed with minimum care.

No. 1 The grass should be mowed first time when it reaches approximately 3 inches height and the mower must be set to leave the grass blades or stems $2\frac{1}{2}$ inches high. i.e. The top tips of grass only is mowed not the main body, mowing is accomplished only as needed not on a set schedule.

No. 2 When weeds appear, a very simple and easy solution for elimination is application of Wedo which also adds additional nutrient to the grass while eliminating the weeds.

No. 3 Crab grass germinates from seed deposited from previous year and not from the plant roots. The 2 and 3 leaf crab grass seedlings will start to appear about May or June and must be weeded out by hand at this early stage as most Crab Grass Killers are likely to do more harm than good, except for use of Crab Grass Killers that also kill crab grass seed. Best applications are made to kill the seed, December and/or January. Make a check of appearance of new seedlings and weed out as they appear.

No. 4 Best control of wild onions requires application of 2-4-D each year for three years. (Digging up onions only tends to spread them.)

No. 5 If water doesn't stand, fungus moss can usually be eliminated and strength given to the grass by aeration. (Punching small holes in the soil with a board which has numerous nails extending low or use of a regular aerator). This is a form of cultivation for grass and is exceptionally worth while to do every 30 days at least from June thru October.
